Awards

INTERNORGA Future Award 2019

WMF CoffeeConnect wins the INTERNORGA Future Award 2019 in the category "Technology and Equipment". The experts especially appreciated how the digital solution enables small, medium and large companies to optimize their processes and thus increase efficiency and profitability. The solution also impressed the judges by enabling decision-makers in the coffee industry to make their processes efficient, economical and therefore sustainable. <https://www.internorga.com/en/news-details/article/what-the-2019-winners-said/>

IDEAward 2019

The telemetric solution WMF CoffeeConnect was awarded the Confare IDEAward in September 2019. Here is what's so special about this IT award: the nominees were selected using artificial intelligence. The nominated innovations were, however, ultimately judged by an expert jury of "real people". Confare honoured digital pioneers for successfully meeting the challenges of digital transformation with innovative projects and thus actively shaping the future. With its digital solution, WMF is presenting itself as a service provider and making it possible to centrally manage professional coffee machines efficiently and comprehensively. For instance, the machine data that is collected can be used to ensure that raw materials and other consumables are purchased in as efficient a manner as possible. Maintenance work or technician deployments can also be planned with foresight and economic efficiency. In addition, the system contributes to sustainable sales growth by evaluating sales and turnover figures.

Awards

Best Practice Award Business Intelligence and Analytics 2018

The independent consulting and analyst company Business Application Research Center (BARC) from Würzburg, Germany, awarded 2018 the "Best Practice Award Business Intelligence and Analytics" to the digital solution WMF CoffeeConnect. At the Big Data World in Frankfurt, jury and expert audience voted the WMF solution as winner in the category "corporate solutions". The expert jury praised the high degree of innovation of the digital solutions for professional coffee machines. The intelligent combination and targeted evaluation of IoT and classic data sources allows the targeted improvement of efficiency and profitability in the coffee machine business of B2B customers.

IOT Zertifikat 2019

Our professional coffee machines from WMF and Schaerer have been certified by TÜV Rheinland as 'Protected Privacy IOT Product' in 2019. This certificate attests to the compliance with current data protection and information security requirements for the communication between coffee machine and digital platform.
